

Course I: Digital Revolution

The digital revolution transforms the way we live, work and interact with each other. But how did it start, where is it headed, and what does it mean for European citizens and businesses?

The Digital Revolution course answers all these questions and takes you through a reflective journey, explaining the rise of digital technologies, their core elements and implications with relatable everyday life and work examples.

At the end of this course, you will be able to:

Understand what computers are, how they work, and how hardware technology advancements **impact our lives.**

Comprehend the basics of coding languages, software, and applications as they impart logic to machines while providing an interface for humans.

Visualise the evolution of computer networks, from home and office networks, to the internet, cloud computing, and beyond.

Understand how the digital revolution has set the stage for **big data, Artificial Intelligence (AI), and other emerging technologies** that were only theorised before.
